OUR STORY

> ❝ *We did the whole lab in General Data equipment and have been fully satisfied with every aspect from start to finish.*❞
>
> **- M PARRISH, HISTOLOGY MANAGER**

TRUSTED RESULTS
FOR PATHOLOGISTS, PATIENTS, AND THEIR FAMILIES

As a lab professional, you play a vital role in helping patients receive the right diagnosis and treatment. Your work is a science and an art — you treat every case, specimen, cassette and slide as if it belonged to a family member anxiously waiting for results.

At General Data, we share your passion for delivering timely and accurate results that optimize patient outcomes. We're committed to continually developing products and solutions that transform lab workflows and processes so you can focus on improving the lives of your patients, one test at a time. Our portfolio includes world-class cassette and slide identification and tracking solutions, as well as innovative lab instruments and supplies that help labs enhance efficiencies, increase throughput and improve patient safety.

General Data HEALTHCARE

TRANSFORMING SPECIMEN TRACKING
HOW IT ALL BEGAN

Over 15 years ago, General Data partnered with visionaries at leading universities and research labs across the country to address specimen identification and tracking issues that were causing significant workflow inefficiencies and other problems in the lab. At that time, handwriting and manual processes were the norm, and frustrated technicians were wasting countless hours dealing with identification errors as previous attempts to incorporate reliable barcode identification and tracking systems had failed to produce results.

What if there was a better way?

With over 40 years of experience developing barcode identification and tracking solutions for industrial applications, General Data revolutionized the lab workflow by pioneering the first laser cassette printing and pre-stainer slide labeling technologies. These technologies quickly became the foundation for an efficient and reliable barcode-based specimen identification and tracking solution, from sample accessioning through case sign-out.

BETTER BARCODES
FEWER BOTTLENECKS

Today, General Data's laser cassette printers and other tissue identification and tracking solutions are used by top labs both in the U.S. and around the world. Why? Because it's all about the barcode. A lab's workflow is only as accurate and efficient as its identification and tracking system — and that depends on labeling slides and tissue cassettes with highly legible barcodes that scan quickly and reliably every time.

Nobody does it better than General Data.

We've also expanded our product portfolio to include other lab instruments and supplies that focus on helping labs like yours improve efficiency, control costs and eliminate errors so you can focus on what matters most: delivering the highest-quality results to clinicians, patients and their families.

EXPERIENCE
THE GENERAL DATA DIFFERENCE

What sets General Data apart? We do more than just provide instruments and supplies. We incorporate value-added services to make sure your lab not only gets the most from our products but can also rely on them for years to come.

INSTALLATION
We offer on-site setup and installation services to make sure everything is running smoothly from the start.

INTEGRATION & CUSTOM APP DEVELOPMENT
We can integrate your instruments with your LIS system. We can also produce custom software applications tailored to your lab's unique workflow and needs.

TECHNICAL SUPPORT
Got a question about how to use your new General Data instrument? Our support staff is ready to help.

SERVICE PLANS & OPTIONS
Choose from a range of different service plans to maintain your instrument and make sure it's always running when you need it.

READY FOR RELIABILITY?

BROWSE OUR PRODUCT PORTFOLIO AND LET US HELP YOU FIND THE BEST SOLUTIONS FOR YOUR UNIQUE LAB WORKFLOW.

GeneralData
HEALTHCARE

The scan rate has been 100% at the grossing, embedding and microtomy stations – over 21,000 scans with no fails. Phenomenal!"

- BR TAYLOR, BS, MS, C(ASCP)

LASERTRACK™
CASSETTE PRINTERS

The LaserTrack series of cassette printers are the top choice for histology labs that demand smooth, efficient, dependable and error-free printing and labeling of cassettes as part of their lab workflow. Our unique laser printing technology consistently and reliably produces sharp, crisp text and 2D barcodes that are permanent and deliver nearly perfect scan rates.

When implementing barcode technology to identify and track patient specimens, remember that patient safety depends on clear, high-resolution barcodes that you can rely on to scan each and every time.

LASERTRACK™
FLEX™ CASSETTE PRINTERS

LASERTRACK™ FLEX™ CASSETTE PRINTER

Part # G1-LTF-XXXX

The LaserTrack™ FLEX™ Cassette Printer is a revolutionary new concept for cassette printing in histology labs. Instead of being locked into a set configuration for your lab's cassette printers, the FLEX offers different configuration options that can be customized for your current needs. In addition, the FLEX can be upgraded any time after purchase to meet your future needs without sacrificing functionality or replacing the printer entirely.
FEATURES & BENEFITS

• Variable capacity starts at 480 cassettes, with the ability to upgrade capacity up to 800 cassettes any time after purchase.

• Uses laser imaging technology to print high definition text and 2D barcodes that consistently deliver nearly perfect scan rates.

• Prints on one, two or three sides of the cassette so you can capture more data on a single cassette.

• Compact footprint measures 13"L x 19"D.

• Easily interfaces with LIS/LIMS systems including Epic® Beaker®, Cerner® CoPathPlus®, Sunquest CoPathPlus®, SoftLab® and others.

LASERTRACK™
SLIM™ CASSETTE PRINTERS

LASERTRACK™ SLIM™ CASSETTE PRINTER

Part # G1-LTF-S3320

The LaserTrack SLIM Cassette Printer packs all the power and innovation of LaserTrack cassette printing technology into a slimmed-down small footprint instrument. It's uniquely designed to be placed at grossing stations to support distributed printing lab workflows, while it also can be used for smaller case volumes that use a batch cassette printing workflow.

FEATURES & BENEFITS

• Compact footprint measures 13"L x 13"D, designed for distributed printing lab workflow layout.

• Up to 4 magazines that hold 80 cassettes each.

• Uses laser imaging technology to print high definition text and 2D barcodes that consistently deliver nearly perfect scan rates.

• Prints on one, two or three sides of the cassette so you can capture more data on a single cassette.

• Easily interfaces with LIS/LIMS systems including Epic® Beaker®, Cerner® CoPathPlus®, Sunquest CoPathPlus®, SoftLab® and others

LASERTRACK™
JB-Y SERIES CASSETTE PRINTERS

LASERTRACK™ JB-Y1 CASSETTE PRINTER

Part # G1-205-JBY1

The LaserTrack JBY1 is a small footprint laser cassette printer with a single-magazine configuration. It prints text and barcodes on cassettes at a rate of 5 seconds per cassette. The single magazine can be easily interchanged with other magazines that can be kept in a holder for easy access when printing cassettes.

FEATURES & BENEFITS

• Single magazine holds up to 80 cassettes.

• Uses laser imaging technology to print high definition text and 2D barcodes that consistently deliver nearly perfect scan rates.

• Small footprint enables you to put it anywhere in your lab.

• Easily interfaces with LIS/LIMS systems including Epic® Beaker®, Cerner® CoPathPlus®, Sunquest CoPathPlus®, SoftLab® and others.

LASERTRACK™ JB-Y4 CASSETTE PRINTER

Part # G1-205-JBY4

The LaserTrack JBY4 Laser Cassette Printer is a versatile cassette printer designed for both batch or distributed (on-demand) cassette printing lab workflows. The built-in cassette management system holds up to 100 cassettes, and provides easy organization of printed cassettes ready for delivery to grossing stations. 4 quick-change cassette magazines enable effortless change-outs when other cassette types or color are needed.

FEATURES & BENEFITS

• 4 magazine configuration with each magazine holding up to 70 cassettes, quick and easy magazine change-outs.

• Uses laser imaging technology to print high definition text and 2D barcodes that consistently deliver nearly perfect scan rates.

• Integrated cassette management system holds up to 100 cassettes.

• Easily interfaces with LIS/LIMS systems including Epic® Beaker®, Cerner® CoPathPlus®, Sunquest CoPathPlus®, SoftLab® and others.

LASERTRACK™ CASSETTES

LaserTrack™ cassettes are specifically designed and optimized for use in LaserTrack™ cassette printers. This design results in effective movement within the instrument that not only reduces jamming, but additionally produces optimal barcode scan rates of nearly 100% for worry-free scanning in the lab.

For more information and full product specifications go to general-data.com/cassettes

Slotted Cassettes

5mm x 1mm slots in base and lid for optimal reagent flow. Typically used for tissue specimens. Available with lids attached or separate.

Large Square Hole Cassettes

1mm square holes in base and lid. Typically used for biopsy specimens. Available with lids attached or separate.

Small Square Hole Cassettes

.26mm square holes in base and lid. Typically used for needle biopsy specimens. Available with lids attached or separate.

Chambered Cassettes

Typically used to separate and process multiple specimens. Small mesh holes in cassette and lid. 4 chamber configuration has 13mm square chambers with .38mm square holes. 6 chamber configuration has 7mm x 12mm chambers with .26mm square holes. Available with lids attached.

Large Round Hole Cassettes

2mm diameter holes in base and lid. Typically used for larger tissue specimens. Metal lids sold separately.

SLIDETRACK™
SLIDE PRINTERS

SLIDETRACK™ ESPO SLIDE PRINTER

Part # G1-ESP-001W

The SlideTrack ESPO microscope slide printer revolutionizes the laboratory by providing both batch and on-demand slide printing, creating a more efficient lab workflow while minimizing errors. The SlideTrack ESPO enables you to print text and barcodes directly on your slides on-demand, as you need them using thermal transfer printing technology. And because of the small size of this powerful instrument, you can produce printed slides right at your microtomy station as the specimens are being cut.

FEATURES & BENEFITS

• Prints text and barcodes directly on the surface of the slide at a rate of 3 seconds per slide.

• Two cartridges hold 100 slides each for continuous printing, can also print single slides using front-loading feature.

• Compact footprint allows for easy placement at the microtome station.

• Connectivity to standalone computers or LIS via WiFi, LAN or USB.

MICROSCOPE SLIDES
ADHESION - ALL PURPOSE & IHC

ADHESION MICROSCOPE SLIDES

Both APS and TOMO slides are designed to work with SlideTrack ESPO slide printers.

MATSUNAMI TOMO®
IHC HYDROPHILIC SLIDES
Designed for optimal IHC performance, TOMO® slides feature optically clear, low fluorescence glass for stronger tissue adhesion, enhanced staining performance and consistent results even in challenging lab environments.

MATSUNAMI APS
ALL PURPOSE HYDROPHILIC SLIDES
One slide for all applications - H&E, IHC and special stains. APS slides provide superior adhesion, minimal background staining, and a specialized coating that ensures even fluid distribution for optimal staining results.

STAINERSHIELD™
SLIDE LABELS

STAINERSHIELD™ XT SLIDE LABELS

StainerShield XT chemical-resistant and solvent-resistant microscope slide labels enable histology labs to use barcode technology to permanently, positively and reliably identify and track specimen slides, even when subjected to the harshest chemicals, stains and protocols. More than just a "xylene-resistant label," StainerShield XT slide labels can withstand exposures to hematoxylin and eosin (H&E) stains, Immunohistochemistry (IHC) special stains, xylene, toluene, acetone, buffers, alcohol, extreme heat, microwaves and decloaking chambers.

StainerShield XT slide labels are printed using a desktop thermal slide label printer. They produce clear, crisp printed barcodes and text that remain legible, do not fade or smear, and produce successful scans - even after stainer processing. They do not require any additional flap or overlay for protection.

FEATURES & BENEFITS

- Only microscope slide label designed specifically for use on histology lab slides

- Print using compact desktop thermal slide label printers

- Printed text and barcodes do not smear, fade, degrade or separate from the slide

- Tested to Library of Congress standards for compliance

For more information and full product specifications go to
general-data.com/stainershield

StainerShield XT labels are sold in kits that consist of rolls of labels and a special thermal transfer printer ribbon. StainerShield DT labels do not require a printer ribbon, so none is included.

StainerShield XT slide labels are resistant to extended exposures in:

- xylene	- IHC stains	- heat
- toluene	- alcohol	- microwaves
- H&E stains	- buffers	

PART NUMBERS
Part numbers vary based on:

- Label size
- Number of labels on a roll
- Make, model and type of printer used
- Application and staining protocol

Contact us to determine the correct part number to order based on your individual needs.
SPECIALTY LAB LABELS

CONSULT-ID™ SLIDE LABELS

Part # L-CN-D78115PI

Consult-ID slide labels can be placed over an existing slide label to temporarily conceal the original lab's identifiers and replace them with the consult lab's information. When the consult is complete, the label can be easily removed without destroying the original label underneath. Printed used standard desktop thermal printer.

Learn more at
general-data.com/consultID

CONSULT-ID™ CASSETTE LABELS

Part # KCN-05240-78115, KCN-05200-78115 (DEPENDING ON PRINTER MODEL)

Consult-ID cassette labels are formulated with a special adhesive that is designed to adhere to the paraffin in an embedded cassette. The label includes a small band that can be affixed to the side of a cassette. After the consult is complete, the label can be easily removed before returning the cassette back to the original lab. Printed using a standard desktop thermal transfer printer. Kit contains 1 roll of labels and 1 printer ribbon.

LAB INSTRUMENTS

SHURDRY™ SD-III SLIDE DRYER

Part # SD-III-120

The SHURDry SD-III Slide Dryer employs rapid slide drying technology that increases lab productivity and produces superior results. Utilizing internal microprocessors and programmable precision controls, the SD-III Slide Dryer can accommodate additional needs, including keeping paraffin liquefied. This slide dryer also has a large capacity interior with an adjustable shelf that allows it to accommodate many different size slide racks or bowls that need to be kept warm.

FEATURES & BENEFITS

• Programmable timer enables precise control of drying times.

• Small counter top footprint - large internal capacity.

• See-through doors allow for easy visual monitoring.

• Keeps paraffin liquefied.

General Data HEALTHCARE

LAB INSTRUMENTS

SHUR**CLEAN**™ FUME HOODS

Part #'s:
SC-36S-X: 36" wide, built-in filtration for xylene
SC-36S-F: 36" wide, built-in filtration for formalin
SC-36S-WOME-TV: 36" wide, 6" top-mounted ports for external exhaust
SC-48S-WOME-TV: 48" wide, 6" top-mounted ports for external exhaust
SC-36S-WOME-RV: 36" wide, 6" rear-mounted ports for external exhaust
SC-48S-WOME-RV: 48" wide, 6" rear-mounted ports for external exhaust

SHURClean Fume Hoods provide lab ventilation to effectively protect technicians from the hazardous fumes associated with histology chemicals and solvents. Even when HVAC ventilation is not available or possible, histotechnologists can safely utilize chemicals such as xylene and formalin in the grossing area of the lab. The SC-36S-X/F is an ideal solution for adding fume hoods to labs without the need for extensive equipment reconfiguration, as these models have built-in filters for both xylene and formalin fumes.

FEATURES & BENEFITS
- User-friendly control panel.
- Built-in filtration for easy placement (SC-36S-X/F models).
- Top or rear-mounted exhaust ports (SC-36S/48S-WOME-TV/RV models).

SHUR**STAIN**™ MANUAL SLIDE STAINERS

Part #'s:
SS-3L: 3 position rack
SS-6L: 6 position rack
SS-12L: 12 position rack

The SHURStain Manual Stainers utilize a modular designs and are available by size to allow you to select the number of individual staining positions necessary to meet the needs of your lab or your special stain or individual staining application. SHURStain staining racks are produced in 3, 6, and 12-well configurations, and multiple units can be interlocked to increase staining volume capabilities. Each SHURStain rack comes with a supply of replaceable documentation strips to record reagent brand, lot #, date changed, etc.

FEATURES & BENEFITS
- Choose the size that best fits your needs.
- Multiple units can be interlocked to increase staining volume capabilities.
- Sliding lids allow easy access with minimal solvent loss.
