

6 3 5 R

Thermal Transfer

R e s i n R i b b o n

635R Textile Resin

This full resin ribbon features our printhead protecting backcoat, and unique ink formulation for superior anti-static characteristics. The 635R produces superior quality printing with the excellent abrasion, heat and water resistance, making it ideal for garment care and other textile applications.

Recommended Applications

GARMENT

TEXTILE

Recommended Substrates

Woven and nonwoven fabrics, films, synthetics, satins and coated textile labels

Performance Characteristics

- Quality edge definition and print quality for crisp barcodes, text and images
- High resolution printing ideal for dry cleaning, laundry and other textile applications
- Dissipates static for easy handling and extended printhead life
- Excellent resistance to abrasion, heat, water and steam

Tech Specs

- | | |
|----------------------|----------------------|
| • Smudge Resistance | Application specific |
| • Scratch Resistance | Application specific |
| • Optical Density | Application specific |
| • Ink Melting Point | 150° C (302° F) |

•••Testing under end-user conditions is always recommended to ensure the selected ribbon formulation is suitable for specific application requirements•••
