Tech Specs

	Smudge Resistance	Scratch Resistance	Optical Density	Ink Melting Point
615R Performance Resin	A	A	> 1.40	110° C (230° F)

Performance Characteristics:

Superior edge definition and print quality for crisp barcodes, text and images
 High resolution printing ideal for film label and tag materials up to 8 IPS (inches / second)
 Dissipates static for easy handling and extended printhead life
 Superior solvent, abrasion, heat and UV exposure resistance

Recommended Substrates:

Coated papers, synthetic papers, polyethylene, polypropylene, polyolefin and polyester

Recommended Applications:

Automotive

Product ID

Shrink Wrap

Healthcare

Shelf

Flexible Packaging

Electric Component

Medical Devices

Asset Tracking

Chemical Drum

Extreme Environment

Outdoor

RFID

Hazmat

Security

Pharmaceutical

PRODUCT DISCLAIMER

Testing under end-user conditions is always recommended to ensure the selected ribbon formulation is suitable for specific application requirements.
