

FIREBUG EXT

Barcode Fire Extinguisher Inspection System

Automate fire extinguisher inspections and safety equipment inspections the easy way - with barcode technology and the new Android-based **Firebug EXT**.

Identify

Use barcode technology to identify each asset and its location

Inspect

Routing and checklists ensure every asset is inspected and verified

Record

Use Android-based handheld devices or tablets to easily record readings and inspection results

Report

Generate detailed reports to show inspection results and compliance

Tailored around the safety inspector's needs, **Firebug EXT** combines re-designed and updated software with durable barcode labels and handheld devices or tablets running Android to direct and record the inspection of any fire extinguisher or safety device. Every inspection and result is date and time recorded, giving managers an accurate record of the work completed.

Firebug EXT - Extended Capabilities

Runs on Android Devices

Now powered by Android - the mobile operating system preferred by users of enterprise and field mobility systems.

Redesigned Interface

Navigation is intuitive, screens are easy to read and information is right where you expect to find it.

Tablet Support

In addition to handheld devices, Firebug EXT now supports tablets running on Android.

Reports

Firebug EXT includes 9 standard reports that can be sorted in unlimited ways. Reports are available as either a PDF or Excel spreadsheet.

Dashboard Views

See all of your critical inspection data and results at a glance with our new dashboard feature.

Record Readings

Easily record critical readings and calibration data from fire extinguishers and safety devices directly into Firebug EXT.

Sync via WIFI, Cellular or Cradle

Upload inspection data and results from any location through WIFI or cellular connection or through a cradle connection directly to a PC.

Web Hosting Option

Host the Firebug EXT barcode inspection system on General Data's web server. Make the system available over the internet to any user whom you give rights.

| | Stand Alone System | Workstation | Small Network Server | Large Network App Server | Large Network SQL Server |
|----------------------------|--|--|--|---|---|
| Database Type | Microsoft SQL Express | n/a | Microsoft SQL Express 2008 or newer | Microsoft SQL 2008 or newer | Microsoft SQL 2008 or newer |
| Operating System | Win 7 Pro/ Server 2008 R2 Framework 4.5.2 IIS 7 8 GB Memory | Win 7 Pro/ Server 2008 R2 Framework 4.5.2 IIS 7 8 GB Memory | Win 7 Pro or Server 2008 R2 or Server2014 R2 Framework 4.5.2 IIS 7 16 GB Memory | Server 2008 or newer Framework 4.5.2 IIS7 16 GB Memory | Server 2008 or newer Framework 4.5.2 IIS7 16 GB Memory |
| Mobile Device | Android Jelly Bean (v4.1) or newer | | | | |
