

# General Data

Smarter Technology. Exceptional Results.

## Coated Products Digital Receptive Coatings

General Data has a wide variety of coating capabilities that few in the industry can match, including digital receptive coatings. General Data's digital receptive coating expertise allows you to print with superb ink adhesion and accelerates your ink dry time. While we offer a standard coating for most digital printers, we are able to develop a customized coating for your specific application.

For materials that need a digital receptive top coat, let General Data prepare your material so you can print what you want from any digital printer.

---

The digital printing market is growing rapidly with many different equipment technologies. Here are a few:
