

## GlassStick™ Labels

This pre-printed labeling solution is specially designed for ultimate adhesion to glass surfaces, while maintaining the ability to be cleanly removed without leaving any residue behind. These labels are self-wound, and feature a release coating on the face, eliminating the need for a liner, allowing for easier application and waste savings.

### Features & Benefits

- **Linerless Construction** – Simplifies label application and eliminates waste and safety hazards, improving overall efficiency.
- **Ultra-Removable Adhesive** – This microsphere adhesive provides quick tack and lasting adhesion with clean removability.
- **Pre-Printed** – Instructions, ratings and other Information is pre-printed with up to five colors for crisp barcodes, text and images.
- **Accurate Inventory Tracking** – With GlassStick™ labels, assets and items with glass surfaces are barcode identified and tracked from the manufacturing floor to the construction site.
- **Cost-Effective** – Precision engineering provides a capable and cost-effective labeling solution.
- **Certified ISO Quality** – Our label manufacturing and converting operation is certified to the ISO 9001 international standard for quality management.

### Material Specifications

- High quality, 2.8 mil semi-gloss paper facestock
- Ultra-removable, microsphere adhesive
- Minimum Application Temperature +40°F
- Service Temperature Range +20°F to +150°F
- Linerless construction

### Recommended Applications for GlassStick™ Labels

GlassStick™ labels are ideal for glass surface applications where parts, assets or other items need to be identified with barcodes and other critical information. These include:

- Window branding & installation instructions
- Bathroom fixture manufacturing
- Window & door manufacturing
- Retail & event window advertising
