

Protect every life story™ in your lab.

Microtomy

ID/Positive™ ScanPrint™ System

The ID/Positive ScanPrint System enables labs to scan barcodes on cassettes to print slide labels on-demand at the microtome station. ScanPrint quickly and accurately labels slides with accession, block, stain and level information in both barcode and readable text formats. This system enables the addition of on-demand barcode labeling without the need for an additional LIS module or special slide labeling software. Since this is a standalone system, ScanPrint does not require interfacing with your existing LIS.

On-Demand Barcode Slide Labeling

ScanPrint is a standalone system that enables a user to scan a properly formatted cassette, then scan the appropriate protocol card, without the need for an additional LIS module or additional computer workstation. The printer's LED display prompts the technician for any needed keyboard input, and the printer generates the slide labels for that specific block.

Compact Footprint at the Microtome Station

Ideal for crowded cutting stations, the system quickly and accurately labels produces slide labels at the microtome station where they are produced. Eliminate handwritten slides completely; reduce or eliminate errors and workflow inefficiencies due to mis-identification of slides.

Customized Lab-Specific Protocol Cards

The system generates customized cards that contain the protocol information specific to that lab, which is used to facilitate printing of slide labels for individual stains, levels, and re-cuts.

Print to StainerShield® XT Slide Labels

StainerShield XT slide labels are designed for use on slides across all lab protocols, including special stains, IHC's cytopathology, and other protocols that require exposure to specialized chemicals and stains beyond standard H&E protocols. StainerShield XT's advanced technology is built to withstand extreme heat, exposure to harsh chemicals, reagents, and stains, as well as extreme handling without degradation or separation from the slide, and with no need for an overlamine flap.

How To Order:

C6-7CC-1011	Compact Scanner
C6-7CC-1010	Compact Scanner Stand
C6-7CC-1009	Compact Scanner and Stand Combination
C9-204-2130	Slide Label Printer
G1-AFF-7011	Keyboard (not pictured)
G1-7DD-4991	Custom Program
C6-7CC-1012	ScanPrint Kit

Note: StainerShield XT is available in kits containing the correct match of label rolls and printer ribbons. Each kit is designed for use with specific printer makes and models, and has been optimized for printer compatibility with no waste. If you are unsure of your printer specifications, please check with your local rep or contact us via our web site or email address, listed below.

KXT-05240-78110	1 Printer Ribbon: 1/2" core, 2.4" print width, coated side out, notched core 3 rolls of labels, : 7/8"x7/8", 1" label core, 1800 labels per roll
